

DANIEL NNODIM

Software Engineer · Fintech & Quantitative Systems

Decorah, IA, USA · +1 (319) 252-6656 · nnodimdan@gmail.com

nnodimdan.com · github.com/nnodimdann · linkedin.com/in/nnodimdan

Full-stack engineer who ships and tests production software, building financial apps that compute cost-of-goods, unit-level margins, and revenue projections on Next.js and MongoDB. Also comfortable in quantitative work, having built econometric models on a 100-firm dataset in R. F-1 OPT authorized; targeting fintech and quant engineering teams.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, R

Web & Backend: React, Next.js, Node.js, Express, MongoDB, REST APIs, MERN stack

Testing & Tooling: Jest, Playwright (Chromium/Firefox/WebKit), Git, GitHub, Jira, Sentry, Vercel, CI/CD, RPA

Quantitative: OLS regression, Fama-French factor modeling, HC3 robust errors, VIF and RESET diagnostics, financial data APIs

PROJECTS

TeamBlueLock - Financial Operations Platform

2026

Next.js, MongoDB, TypeScript, Vercel · 3-developer team · Live demo + GitHub

- Co-built and deployed a production web app for inventory, ingredient-level costing, and profit-margin reporting that computes cost-of-goods and unit-level margins in real time for small businesses.
- Owned quality assurance for the team: wrote **90 automated tests** (41 Jest unit/UI, 49 Playwright end-to-end across three browser engines), reaching **90% statement and line coverage**.
- Set up Sentry error monitoring and TypeDoc API docs, and coordinated a three-developer workflow through GitHub and Jira.

MonoTrade - Stock Portfolio Web App

2025

Next.js (App Router), TypeScript

- Built a stock-portfolio tracker on the Next.js App Router with real-time market-data display and AI-generated stock-analysis reports.

Personal Finance Tracker - Full-Stack Web App

2025

Full-stack JavaScript · Live demo

- Built an income and expense tracker with transaction categorization, budget limits, and real-time budget-variance and spending-trend reporting.

Currency Converter - Live FX Rate Tool

2024

Python · Live demo

- Built a tool that consumes a live FX-rate API and converts across currency pairs on demand.

EXPERIENCE

Finance & Operations Lead (Incoming)

Jun 2026 – Present

Ozyberg Sicurezza Limited - Remote

- Build and maintain the financial models behind contract pricing, cost estimation, and profitability analysis across the firm's service lines.
- Own management reporting and working-capital tracking across active contracts, and run feasibility analysis on prospective engagements.

DevOps Engineer Intern

Jun 2024 – Aug 2024

NNPC Limited - Abuja, Nigeria

- Automated JavaScript deployment workflows and applied robotic process automation to CI/CD pipelines, cutting manual release steps and improving reliability; documented the work as reusable runbooks for the team.

Network Technician

May 2025 – Aug 2025

Luther College IT Services - Decorah, IA

- Configured and troubleshot campus network infrastructure (switches, routers, access points) via Aruba Central and HPE GreenLake; ran performance analysis to locate bottlenecks.

EDUCATION

B.A., Computer Science & Economics (Double Major)

Aug 2022 – May 2026

Luther College - Decorah, IA · Davis UWC Scholar · GPA 3.04 cumulative, 3.63 final year (upward trajectory)

Coursework: Advanced Algorithms & Data Structures, Database Management Systems, Computer Networks, Econometrics, Intermediate Micro/Macroeconomics.
