Decorah, Iowa, USA | 43 Birnin Kebbi Crescent, Garki, Abuja, Nigeria

PROFESSIONAL PROFILE

Computer Science and Economics graduate with experience in quantitative research, financial modelling, full-stack financial application development, and enterprise process improvement. Incoming Head of Finance and Investment at Ozyberg Sicurezza Limited, a security consulting firm with nationwide operations and corporate offices in Abuja and Lagos, providing risk management and protective services across West Africa. International background spanning Africa, Asia, and North America. Final-year GPA of 86.1% across quantitative and economics coursework. Pursuing the Sobey School of Business Master of Finance programme to build depth in corporate finance, investment analysis, and financial markets.

EDUCATION

Bachelor of Arts, Computer Science & Economics (Double Major)

Aug 2022 – May 2026

Luther College, Decorah, Iowa, USA

- Cumulative GPA: 3.036 / 4.0 (77.6%); Final-year GPA: 3.629 / 4.0 (86.1%), with a clear upward trend across four years
- Honours and Awards: Davis United World College (UWC) Scholarship; Duke of Edinburgh's International Award
- Selected Economics coursework (A and B+ grades): Intermediate Microeconomics (A-), Introduction to Econometrics (A-), Economic

Numeracy (B+), Intermediate Macroeconomics (B+), Development Economics (A-), International Trade (B+), Economics of Inequality (B+), ECON Senior Project (A-)

- Selected CS coursework (A and B+ grades): Fund of Web Programming (A), Data Modelling and Querying (A-), Internet Programming (B+), Senior CS Project (A), Writing in the Major Lab (A)

International Baccalaureate (IB) Diploma Programme

Aug 2020 – May 2022

UWC Mahindra College, Pune, India

- One of 18 United World College campuses worldwide, drawing students from over 90 countries; programme emphasis on economics, mathematics, and analytical writing
- Studies in Computer Science, Economics, Mathematics, and English Language and Literature, providing a strong analytical and quantitative foundation ahead of undergraduate study.

RESEARCH & CAPSTONE PROJECTS

Analysing the Impact of R&D on Stock Returns Across Technology and Non-Technology Sectors

ECON 490 Senior Project, Luther College | Supervisor: Prof. Jacob Michels | 2025-2026

- Original empirical finance study on whether R&D investment intensity predicts annual stock returns for 100 publicly traded firms, with a sector-level split between technology and non-technology companies.
- Built and estimated a cross-sectional OLS regression model drawing on the Fama-French asset pricing framework, with firm size and profitability as control variables.

- Applied HC3 heteroscedasticity-consistent standard errors, variance inflation factor (VIF) diagnostics, and Ramsey RESET test for specification testing, consistent with graduate-level econometric standards.
- Results ($R^2 \approx 0.01$; no statistically significant R&D premium) interpreted through Efficient Market Hypothesis reasoning, with identification of omitted-variable limitations and proposed extensions including Fama-French five-factor controls and panel data structure.

TeamBlueLock: Full-Stack Financial Analysis Platform (CS 490/491 Senior Project)

Luther College Computer Science | 2025-2026

- Co-built a production-deployed web application covering inventory management, recipe ingredient costing, and profit-margin reporting for small and medium-sized businesses.
- Led quality assurance: 90 automated tests (41 Jest unit/UI; 49 Playwright end-to-end across Chromium, Firefox, and WebKit), reaching 90% statement and line code coverage.
- Platform computed real-time cost of goods, unit-level profit margins, and revenue projections using Next.js, MongoDB, and Vercel; financial logic applied standard cost-accounting and management accounting methods.
- Coordinated multi-developer collaboration via GitHub and Jira; set up Sentry error monitoring and TypeDoc API documentation.

Norway's Green Transition: Economic Challenges and Plausible Policy Solutions

Luther College Economics Research | 2025

- Structural macroeconomic analysis of Norway's petroleum-dependent fiscal framework, covering stranded-asset exposure, sovereign wealth fund redeployment, and labour-market displacement from skills mismatch.
- Proposed a policy framework covering fiscal realignment, workforce retraining, and international clean-technology investment cooperation, with relevance to ESG and energy-transition finance.

The Gender Pay Gap: Institutional Drivers and Macro Consequences

Luther College Economics Research | 2025

- Examined structural causes of the U.S. gender pay gap using labour-market and organisational economics; quantified consequences including GDP productivity loss, firm turnover costs, and household poverty risk.
- Proposed policy responses addressing hiring bias, parental-leave wage scarring, and human capital access, drawing on applied microeconomic theory.

PERSONAL FINANCE & TECHNOLOGY PROJECTS

Personal Finance Tracker (Full-Stack Web Application)

- Income and expense tracking platform with budget-setting, transaction categorisation, and spending-trend reporting against set limits; the budget-variance logic mirrors standard corporate cash-flow management methods.
- Covers budgeting mechanics, transaction classification, and financial reporting against targets, areas that sit within financial planning and analysis (FP&A) practice.

E-Commerce Platform (MERN Stack with Integrated Secure Payments)

- Full MERN-stack (MongoDB, Express, React, Node.js) e-commerce system with product catalogue management, shopping-cart logic, and payment gateway integration covering transaction settlement and revenue reconciliation.
- Modelled inventory turnover and order fulfilment cycles in the backend; working capital principles applied throughout the payment and order management flow.

Currency Converter (Python CLI with Real-Time Foreign Exchange Rates)

- Command-line tool querying live FX rate APIs to convert amounts across currency pairs; built to reflect an understanding of foreign exchange mechanics, rate-feed structure, and cross-currency valuation.
- The ability to consume financial data APIs programmatically is transferable to quantitative research, treasury management, and financial data work.

PROFESSIONAL EXPERIENCE

Head, Finance and Investment (Incoming), Ozyberg Sicurezza Limited

Resumption - Jun 2026 | Abuja, Nigeria

- Will lead all finance and investment functions for a security consulting firm, including budgeting, financial reporting, cash-flow management, and treasury operations across the company's service lines and project engagements.
- Will develop and maintain financial models to support contract pricing, project cost estimates, and profitability analysis for security consulting mandates spanning corporate clients, government agencies, and infrastructure protection assignments.

- Will advise senior management on capital allocation decisions, evaluating investment opportunities and assessing financial risk in line with the company's growth strategy and the regulatory environment governing private security operations in Nigeria.
- Will prepare and present financial statements, management accounts, and board-level reporting packs, translating financial data into clear operational and strategic recommendations.
- Will manage relationships with banking institutions, negotiate credit facilities, and oversee working capital to maintain liquidity across active contracts and retainer-based service agreements.
- Will coordinate with external auditors and tax advisers to ensure statutory compliance under Nigerian financial reporting standards and relevant tax legislation.
- Will support business development by contributing financial due diligence and investment feasibility analysis on prospective clients and partnership opportunities within the security and risk management sector.

Mail Room Office Assistant, Luther College

Sep 2024 – May 2026 | Decorah, Iowa, USA

- Processed, routed, and handled institutional correspondence and sensitive documents under strict confidentiality standards, consistent with document-control practices in compliance-sensitive environments.
- Maintained supply inventory and placed procurement orders; work included cost tracking and order-cycle management.
- Provided data entry support and assisted with special administrative projects, keeping accuracy and detail central to the work.

Network Technician, Luther College Information Technology Services

May 2025 – Aug 2025 | Decorah, Iowa, USA

- Configured, monitored, and troubleshoot campus network infrastructure including switches, routers, and wireless access points using Aruba Central and HPE GreenLake.
- Wrote hardware configuration documentation and operational procedure records, work that parallels internal controls, audit-trail management, and compliance documentation in financial institutions.
- Carried out system-performance analysis and identified network bottlenecks, building attention to measurable metrics and data reliability.

DevOps Engineer Intern, NNPC Limited

Jun 2024 – Aug 2024 | Abuja, Nigeria

- Worked inside one of Africa's largest state-owned enterprises by revenue, with direct exposure to the capital-allocation, procurement governance, and operational finance environment of a company with multi-billion-dollar infrastructure assets.
- Automated JavaScript deployment workflows and applied Robotic Process Automation (RPA) to CI/CD pipelines; the process improvements translated to cost reduction and resource efficiency.
- Observed how large-scale infrastructure investment decisions interact with commodity price cycles, government fiscal policy, and capital budgeting in an energy sector context.
- Gained familiarity with financial risk management frameworks, procurement controls, and regulatory compliance within a capital-intensive, government-owned organisation.

Resident Assistant, Luther College Residence Life

Aug 2023 – May 2026 | Decorah, Iowa, USA

- Managed a programme budget for resident events, allocating funds, tracking expenditure against approved limits, and reporting outcomes to Residence Life administration.
- Provided academic and personal support to 40 undergraduate residents; work covered peer leadership, conflict resolution, and community coordination.

Administrative Office Assistant, Luther College Student Activity Council

Oct 2022 – Sep 2023 | Iowa, USA

- Managed student activity funding records and supported the review and approval of budget allocation requests; work included exposure to institutional financial governance processes.
- Coordinated scheduling, processed correspondence, and maintained operational records with accuracy and consistency.

Volunteer Assistant, Emporium of Craft

Jan 2018 – Aug 2022 | Abuja, Nigeria

- Supported day-to-day business operations and customer service over four years, contributing to repeat purchase rates and the operational continuity of a small business; early exposure to business finance and customer economics.

TECHNICAL SKILLS

- **Quantitative and Financial:** R, Python, Excel (advanced), SQL, OLS regression, econometric modelling, HC3 standard errors, VIF diagnostics, P&L analysis, budget-variance tracking, profit-margin modelling, FX rate APIs, payment gateway integration

- **Programming:** Python, JavaScript, TypeScript, SQL
- **Web and Application Development:** React, Next.js, Node.js, MERN stack, Git, GitHub
- **Testing and Automation:** Playwright, Jest, Robotic Process Automation (RPA), CI/CD pipelines
- **Enterprise Systems:** Aruba Central, HPE GreenLake, Jira, Sentry, TypeDoc, Vercel

HONOURS, CERTIFICATIONS & ACTIVITIES

- **Scholarships and Awards:** Davis United World College (UWC) Scholarship; Duke of Edinburgh's International Award
- **Certifications:** Basic Life Support (BLS); Mental Health First Aid
- **Campus Leadership:** Member, Luther College Student Senate; Member, Black Student Union; Member, Luther Mock Trial; UWC Alumnus, schooled across Africa, Asia, and North America
